PhD Partnership in Political Science through Science Po and Columbia

Recently, Columbia University and Sciences Po in Paris established a PhD Partnership that enables students in the PhD program at Columbia to earn a PhD at Sciences Po as well. Building on a set of close relationships that have existed between Columbia and Sciences Po for more than a decade, the PhD partnership grants students access to the faculty and resources of two of the most highly regarded departments of political science in the world.

The program allows students to spend two years at the partner institution where they take courses, serve as teaching assistants, pass qualifying exams, conduct research, write dissertations under the direction of joint Columbia-Sciences Po dissertation committees, and become eligible to receive the PhD degrees of both institutions.

Given that Sciences Po is an academic and professional hub of the discipline of political science in France and Europe, Columbia students in the program will become members of an extensive network that is not widely accessible to scholars trained only in the United States. Since students will be fully enrolled at both Columbia and Sciences Po, the faculty at the host school will be more invested in and familiar with their work and therefore will be better able to support them in their applications for positions in the United States and in France and Europe. This will significantly expand the job market opportunities for students in the partnership.

Additional information may be found at http://alliance.columbia.edu/node/82.

We have recently expanded the program to enable students who want to pursue the educational opportunities offered by the partnership to apply for admission when applying to the Columbia PhD program (in previous years, students had to first be enrolled in the PhD program and then wait until the third year of their graduate careers to apply). On the Program of Study page in Columbia's online application system, students should select “Political Science” for their Program of Study and then select the “Autumn Ph.D. partnership with Sciences Po 2013” as their Degree.
